

# FIBRELOK G90

## Standard Grade (SG) woven geotextile

G90 is a geotextile membrane manufactured from extruded slit film polypropylene tapes which are resistant to all naturally occurring soil acids and alkalis and unaffected by bacteria and fungi. It's woven construction delivers high tensile strength, making it particularly suitable for use in separation layers.

### Applications for Fibrelok G90

- Separating/Strengthening – layer under access roads and areas of hard standing
- Separating/Reinforcing– layers under stone foundations for new buildings
- Separation/Reinforcing – layers under new roads, car parks & industrial areas
- Separation – granular fill from sub soils and other fill types

Mechanical Properties	Test Method	Units	G90
Tensile Strength -MD	EN ISO 10319	KN/m	16
Tensile Strength -XD	EN ISO 10319	KN/m	11
Elongation at break - MD	EN ISO 10319	%	20.0
Elongation at break - XD	EN ISO 10319	%	19.0
CBR Puncture Resistance	EN ISO 12236	N	1500
Dynamic Cone Drop	EN ISO 13443	mm	18.0
Hydraulic Properties	Test Method	Units	G90
Opening Size (O <sub>90</sub> )	EN ISO 12956	µm	250
Permeability vertical (V <sub>IH50</sub> )	EN ISO 11058	l/m <sup>2</sup> s	15
Physical Properties	Test Method	Units	G90
Weight	EN ISO 9864	g/m <sup>2</sup>	70
Roll Width		m	2.25m - 4.5m
Roll Length		m	25m - 50m - 100m
